

Power of Peace Conference

I would like to take this opportunity to explain how valuable this conference was. Even though it was a big group of students from all different grades it was a comfortable atmosphere to tackle an important topic like peace.

The presenters were really good at making everyone feel comfortable and willing to talk. They made sure that even during the activities we all felt like we could be honest. They all had a sense of humor which helped make us feel that we could be ourselves. Even when they were joking they kept the discussion on the topic.

It was nice to hear that every student had a story about their lives that influence who they are and how they act. Sometimes it feels like no one can really understand what happens at home or away from school but this gave us an opportunity to think about it and realize that a lot goes on with everyone.

I would recommend that these three presenters come back to the school and either have a follow-up with us or talk to a whole new group. There are definitely kids who could use them. It didn't feel like a waste of our time to be there for two days.

Thank You,

Brandon DeGroff
